Disposable towel with soap and its preparation method -

WU F 94.09.03 94CN-115931

(96.03.06) A47K 7/03, 5/08

The present invention relates to a disposable soap towel and its preparation method. It is characterised by that a towel or a piece of non-woven cloth is used as carrier, and then it is impregnated with soap liquid, and finally dewatered and

dried, so that the invented product can be made up. The product is easy to use, and can be used for personal hygiene, and is applicable to guesthouse, hotel, hospital, family and traveller. (Dwg.No.0)
